

Krishandhar Sharma

Senior IT Infrastructure and Network Security Engineer

krishandhar11@gmail.com +91 9828716224 Jaipur, Rajasthan

PROFESSIONAL SUMMARY

I am Krishandhar Sharma, a Senior IT Infrastructure and Network Security Engineer with hands-on experience in IT infrastructure management, network operations, and technical support across enterprise environments. I am a CEH-certified professional with practical exposure to networking and cybersecurity, including firewalls, EDR/XDR solutions, and incident response. Skilled in Active Directory administration, FortiGate firewall management, and security operations, I focus on ensuring system reliability, threat detection, and regulatory compliance. I am proactive, detail-oriented, and committed to continuous learning and growth in cybersecurity and network security.

PROFESSIONAL EXPERIENCE

Senior IT Infrastructure and Network Security Engineer

Choice Finserv Private Limited

2025-08 - Present

Jaipur, Rajasthan

Provided end-to-end IT infrastructure and security support across 75+ branch locations and Head Office, ensuring high availability, minimal downtime, and secure operations. Administered and managed Active Directory, Windows Servers, and NAS storage, including user provisioning, access control, group policies, and system health monitoring. Configured and managed FortiGate Firewalls, including firewall policy creation, NAT, security rules, VPN implementation, web filtering, application control, URL filtering, deployment and monitoring of Intrusion Prevention System (IPS) and antivirus profiles, along with log analysis, traffic monitoring, and threat detection. Monitored and maintained network infrastructure including switches, routers, and access points, ensuring secure and stable LAN/WAN connectivity across all locations. Performed patch management, vulnerability mitigation, and system hardening to enhance overall security posture. Managed SentinelOne EDR/XDR, including real-time alert monitoring, security alert triaging, incident investigation (malware, ransomware, suspicious activities), threat hunting, root cause analysis, endpoint isolation, remediation and recovery, policy tuning, and endpoint compliance. Followed a structured incident response lifecycle, including detection, analysis, containment, eradication, recovery, and reporting. Actively participated in Information Security (IS) audits, coordinating with external auditors, attending audit meetings, providing audit evidence, logs, policies, and system configurations, supporting gap assessment, identifying control weaknesses, assisting in closure of OFIs, ensuring regulatory compliance with internal policies and RBI/IT guidelines, and maintaining audit-ready documentation with proper remediation tracking. Maintained comprehensive IT and security documentation, including asset inventory, firewall configurations, SOPs, and compliance records. Provided L1/L2 technical support for hardware, software, email, and access-related issues, ensuring timely issue resolution. Conducted cybersecurity awareness sessions, promoting security best practices and reducing human-related security risks.

EDUCATION

MCA

Manipal University

Jaipur, Rajasthan | 2027-05

BCA (Cyber Security)

ICFAI University

Jaipur, Rajasthan | 2025-06

SKILLS

Technical

IT Operations and Infrastructure support

Networking

FortiGate Firewall

Endpoint Security and Patch management

EDR

Soft Skills

Problem Solving

Communication and User support

Time management

Adaptability

Continuous learner

Never give up attitude

Gained hands-on experience in **networking fundamentals** including **IP addressing, subnetting, and routing concepts**. Assisted in **LAN setup and configuration** using **switches, routers, and end devices**. Implemented **VLANs and network segmentation** for efficient **traffic management**. Performed **structured cabling (RJ-45 crimping)** and **troubleshooting of connectivity issues**. Supported **network troubleshooting** by identifying **IP conflicts, misconfigurations, and connectivity failures**, while following standard **documentation and troubleshooting practices**.

PROJECTS

FortiGate Firewall Deployment & Endpoint Security Integration

Designed and implemented a secure network infrastructure using FortiGate Firewall, including configuration of firewall policies, NAT rules, and network segmentation to control inbound and outbound traffic. Deployed SSL VPN/IPsec VPN to enable secure remote access for users. Configured and managed security profiles such as Web Filtering, Application Control, and IPS to protect against malicious traffic and enforce security policies. Monitored network traffic, analysed logs, and performed troubleshooting to resolve connectivity and security issues.

Integrated SentinelOne EDR/XDR for endpoint protection by monitoring real-time alerts, investigating suspicious activities, and executing incident response workflows including detection, analysis, containment (endpoint isolation), eradication, and recovery. Performed basic threat hunting and root cause analysis to enhance overall security posture.

Skills Shown: FortiGate Firewall, NAT, VPN (SSL/IPsec), Security Policies, IPS, Web Filtering, Network Security, SentinelOne EDR, Incident Response, Threat Analysis
